The piece described above has been presented to me for my viewing and analysis. This work on paper corresponds to a page torn from Frida Kahlo's diary (1944-1954). *Fantasmones siniestros* would have been located between page 42 and 43 of the diary according to Luis Martín Lozano's study of this work.

It is to my best opinion and knowledge after having reviewed the piece to the best of my ability through ocular means that this work corresponds to the characteristics in style and materials used by Frida Kahlo in her diary housed in La Casa Azul in Coyoacán, Mexico.
